PROJECTS

Blog Website - React

GitHub Link || Live URL

Tech Stack: React JS | Tailwind CSS | Database: Firebase

- Spearheaded development: Led the creation of a sophisticated blog application using React JS, Tailwind CSS, and Firebase, showcasing advanced features such as stylish notifications, Email JS integration for user-admin communication, and a dynamic admin dashboard for seamless blog post management.
- Responsive design and user engagement: Implemented a responsive design with a user-friendly dark/light mode toggle, incorporating local storage preferences. Enhanced user experience with Google direct authentication via Firebase, and added visually engaging loading animations on each page transition for a polished and captivating interface.
- Expanded skill set: Demonstrated proficiency in CRUD operations, user authentication, and effective utilization of npm packages, showcasing a commitment to continuous improvement and the delivery of high-quality, feature-rich web solutions with cutting-edge technologies.

Ecommerce Website - React

GitHub Link || Live URL

Tech Stack : React.JS | Tailwind CSS | Firebase

- Developed an Ecommerce dress shop using cutting-edge technologies, including React JS for the front end, Tailwind CSS for sleek styling, and Firebase for seamless authentication.
- Implemented a secure and efficient authentication system leveraging Firebase, ensuring user data integrity and providing a smooth and trustworthy shopping experience.
- Created an intuitive and visually appealing user interface with React and Tailwind CSS, focusing on an immersive shopping experience. The design integrates seamlessly with Firebase authentication, enhancing user engagement and trust in the Ecommerce platform.
